Moscow

Equipped with a diverse and promising skill set. Proficient in an assortment of technologies, including HTML, CSS, JavaScript, React and Redux. Dedicated to learning additional technologies and coding languages. Able to effectively self-manage during independent projects, as well as collaborate in a team setting. Looking for an entry-level position at a great company to be a hard-working asset to any team, to learn, grow and develop long-term.

EDUCATION

During my Frontend developer's educational program, I developed many applications with different functionality, based on the provided layouts and technical specifications. The course was divided on modules with strict deadlines. Alternately, I have learn different languages and technologies to solve current task. This way besides technical skills and time-management I learned how 'to google' (There are no information you cannot find in google) and how 'to learn' (Learning is a never-ending process which helps you to achieve visible and invisible horizons). I have not production experience yet, but I have a goal and I have learned – how to achieve that goal.

SKILLS

- HTML
- CSS
- SCSS
- JavaScript
- React
- Redux
- Git
- Firebase
- Figma
- Bootstrap
